

MDAI 2019

The 16th International Conference on Modeling Decisions for Artificial Intelligence

Milan, Italy

September 4–6, 2019

<http://www.mdai.cat/mdai2019>

CALL FOR PAPERS

Aims and goals

In MDAI we are particularly interested in the different facets of decision processes in a broad sense. This includes model building and all kind of mathematical tools for data aggregation, information fusion, and decision making; tools to help decision in data science problems (including e.g., statistical and machine learning algorithms as well as data visualization tools); and algorithms for data privacy and transparency-aware methods so that data processing processes and decisions made from them are fair, transparent and avoid unnecessary disclosure of sensitive information.

The MDAI conference includes the following tracks:

- Aggregation functions,
- Data science,
- Data privacy,
- Graphs and (social) networks.
- Human decision making,
- Recommendation and search.

The conference has been since 2004 a forum for researchers to discuss last results into these areas of research.

MDAI is rated as a CORE B conference by the Computing Research and Education Association of Australasia - CORE.

Submission and Publication

Original technical contributions are sought. Contributions will be selected on the basis of their quality. Papers should not exceed 12 pages in total (using LNAI style).

Proceedings with accepted papers will be published in the LNAI series (Springer) and distributed at the conference, as done in previous MDAI conferences. Besides, papers, that according to the evaluation of the referees, are not suitable for the LNAI but that have some merits will be published in a USB proceedings and scheduled in the MDAI program.
